

DELTA TRAP

Harmony Ecotech Private Limited

(An ISO 9001 : 2015 Certified Company)

Plot No.19, Green Lands Enclave, Jonnabanda
Old Alwal, Secunderabad - 500010 Telangana, INDIA
Tel: +91 9866159683 email: info@harmonyecotech.com
Website: harmonyecotech.com

Product Description: The Delta trap is usually made of polypropylene flute board or plain sheets or even laminated paper board. The name comes from their shape which is in the form of “Delta”. The triangular shaped opening at both ends provides entry for the insects. An arrangement is provided inside the trap to place a sticky adhesive sheet and a hanger to hold the pheromone dispenser.

Physical Dimensions: 250 mm (L) x 200 (W) x 120 mm (H) and customized sizes.

Color: Yellow, White and customized colors.

Materials of construction: U V Stabilized Plastic polymer

Application-How it works: Insects enter the trap through a triangular shape entrance in response to the pheromone that is placed inside the trap. Once inside the trap, insects strike against the wall while in flight and fall on to the adhesive sheet placed at the bottom of the delta trap. Where in they will get stuck and killed.

Effective life span in the field: Multiple seasons (subject to weather conditions)

Storage / Safety / Disposal precaution: Store away from sunlight until the actual moment of placing in the field. Keep away from fire and heat of 60°C plus temperature. Mode of disposal and precautions to be identical to those followed while disposing off any regular plastic polymer product.

Packing: 100 traps along with hangers are packed in one card board carton.
