Product Description:

PheroGlo is an insect trap that comprises of a round tub like container made of UV Stabilized Polypropylene, a central pipe stand to connect the solar powered light, two lure baskets on either side of the stand to hold pheromone dispensers and solar lamp assembly.

Materials of Construction:

UV Stabilized Plastic Polymer.

Dimensions & Color:

30-36 cm (Dia) x 5-7 cm (H) in Blue, Red, Yellow, Grey, Black or can be made in any customized size and colour.

How it Works:

Insects attracted to the pheromone and light are drawn to the trap and fall into the pool of emulsion/water in the tub, drown and die. The dead insects can then be removed from the trap at appropriate intervals and tub refilled with water-oil emulsion.

Target Pests:

All flying insects, specially Tomato Leaf miner in Tomato & Potato and Fruit and Shoot Borer in Egg plant/Brinjal.

Life span (In the Field):

Multiple seasons (subject to weather conditions)

Storage /Disposal:

- Store away from sunlight until the actual moment of placing in the field.
- Avoid dropping from heights on to hard surfaces to prevent breakage.
- Do not use if the base is broken.
- Keep away from fire and heat of 60⁰ C plus temperature.
- Mode of disposal and precautions to be identical to those followed while disposing of any regular plastic polymer product

Disclaimer:

1. All the materials and components used in the manufacturing process are generally known to be non hazardous to human beings.
2. It should be noted that the information is given in good faith and manufacturer assumes no responsibility for any damage that may be caused (by using the product) to men, machinery and materials.
